

Worldwide Operation

Wood has different characteristics depending on the growth conditions. It is our great responsibility to discern the characteristics of each product and be able to sort them properly for different usage. With extensive experiences over many years and solid trust with worldwide suppliers, Emachu group procures high quality wood and building materials from around the world and constantly supplies to Japan and other countries.

[Affiliated Companies]

Emachu group's overseas office carries its business by sorting, inspecting and purchasing local products, and custom cutting the product to meet customer demand. Product destination is mainly Japan, but the growing developing countries are also in focus. Emachu group is also working on overseas real estate development and rental business.

Emachu group imports various kinds of high quality wood and building materials from North America, Russia, Europe, South America, China, Oceania, South East Asia and so on. Continuation and reliability are very important for procurement from overseas. Emachu group displays its ability by closely networking with the leading suppliers in each country and area. We continue to strive to meet our customers' needs and explore new products or suppliers.
